The Hiring Manager
Goldman Sachs

Dear Hiring Manager,

I am writing to express my interest in the Research Intern position at Goldman Sachs. With a recent degree in Information Technology and a strong foundation in data analysis, programming, and problem-solving, I am excited to explore a role that combines my technical expertise with the analytical rigor required in finance. I am particularly drawn to this position because it would allow me to apply my IT background to support the research team's efforts in delivering insights to Goldman Sachs' clients.

Throughout my studies in IT, I developed a range of technical skills, including proficiency in Javascript programming. While my background may be non-traditional for a research role, I am confident that my technical skills and my commitment to learning can make me a valuable contributor to the team.

I am particularly inspired by Goldman Sachs' dedication to data-driven research and innovation, and I am eager to leverage my IT skills to support this mission. My experience in IT has taught me to approach complex problems analytically, think critically, and adapt quickly to new challenges qualities I am eager to bring to this role.

Thank you for considering my application. I am enthusiastic about the opportunity to contribute my skills to Goldman Sachs and to grow my understanding of finance in a dynamic and respected environment. I look forward to hearing from you soon.

Sincerely,
Seka Bernard Junior
